Introduction and Background

This Community Relations Plan (Plan) has been prepared for the Nevada Power Company (NPC) Reid Gardner Station, as part of corrective action activities at the facility. NPC and the Nevada Division of Environmental Protection (NDEP) are negotiating an Administrative Order on Consent (AOC) to address soil and groundwater contamination at the Reid Gardner Station. The AOC provides for the continuation of environmental contaminant characterization activities, allows for the identification and/or screening of corrective actions, and allows for the implementation and long-term operation and maintenance of division-approved corrective actions at associated with the Reid Gardner Station. NDEP has primary authority and responsibility for regulatory oversight of the AOC activities at the NPC Reid Gardner facility.

1.1 Summary and Description

The Nevada Power Company (NPC) Reid Gardner Station is a coal-fired electric generation facility located in Moapa, Nevada, 52 miles northeast of Las Vegas. The facility became commercially operational on June 30, 1965 and is located on private property bordered by the Bureau of Land Management (BLM) and Moapa Indian Reservation property. Surrounding property owners are identified on a stakeholder map located in Appendix B.

1.2 Purpose of this Plan

This Plan will serve as the framework to ensure that information is available to the public during the implementation of the AOC. It describes planned public involvement activities for the site and assigns responsibility for implementation of the communications strategy. The Plan identifies the community relations tools that will be used to encourage meaningful communication between NPC and the public.

The goals of the Plan are to:

- Establish an open working relationship with the stakeholders in the community;

- Keep the public informed as the project progresses and investigative results are received;
- Provide a mechanism for disseminating information on a routine, as well as non-routine, basis in response to individual questions; and
- Provide a mechanism for the public to provide feedback and input to NPC.

1.3 Stakeholders

The stakeholders affected by this Plan include the following entities:

Although the towns of Overton and Logandale retain their own zip codes and post office, in 1981 they merged into one unincorporated township called Moapa Valley. Moapa Valley includes several small communities, including Overton, Logandale, Glendale and Moapa. The Clark County Manager and the Clark County Commissioners (BCC) govern the two separate unincorporated towns of Moapa and Moapa Valley. The Clark County Commissioners appoint a five member Town Advisory Board (TAB) for each town from the local citizenry to make recommendations on policy and funding in each community.

Community Relations Activities

Community relations activities of the Plan will provide a mechanism for dissemination of information from NPC to the community and to receive input from the community during the course of the administrative order on Consent (AOC) implementation activities. This section presents possible activities NPC will utilize to meet the community relations goals identified in Section 1.3.

Public Information Repository. An information repository will provide public access to final copies of work plans, technical reports, and project fact sheets. Information will be available at the Moapa Town Library located at 1340 East Highway 168, Moapa, NV (702)864.2438 or the Moapa Valley Community Center at 320 North Moapa Valley Blvd, Overton, NV (702)397.6475. Electronic copies will be made available, if requested, to minimize space issues. The appropriate location will be selected after contacting Moapa Town officials.

Project Fact Sheets. Fact sheets will be prepared for distribution to the public. The fact sheets will briefly describe the history of the facility, activities planned or being performed at the facility and the status of the project. Fact sheets may also be posted on the NPC website at www.nevadapower.com and the NDEP web site at <http://ndep.nev.gov>. Fact sheets will be prepared and distributed at least annually.

Public Meetings. Public meetings will be held to make available current information about site environmental investigation and remediation activities, answer questions, and respond to specific community concerns, issues or events. Public meetings will be held on an as needed basis, as activities necessitate further public involvement. Public meetings will be announced through published notices in local newspapers and/or mailed announcements. NDEP will attend the public meetings with NPC, if requested.

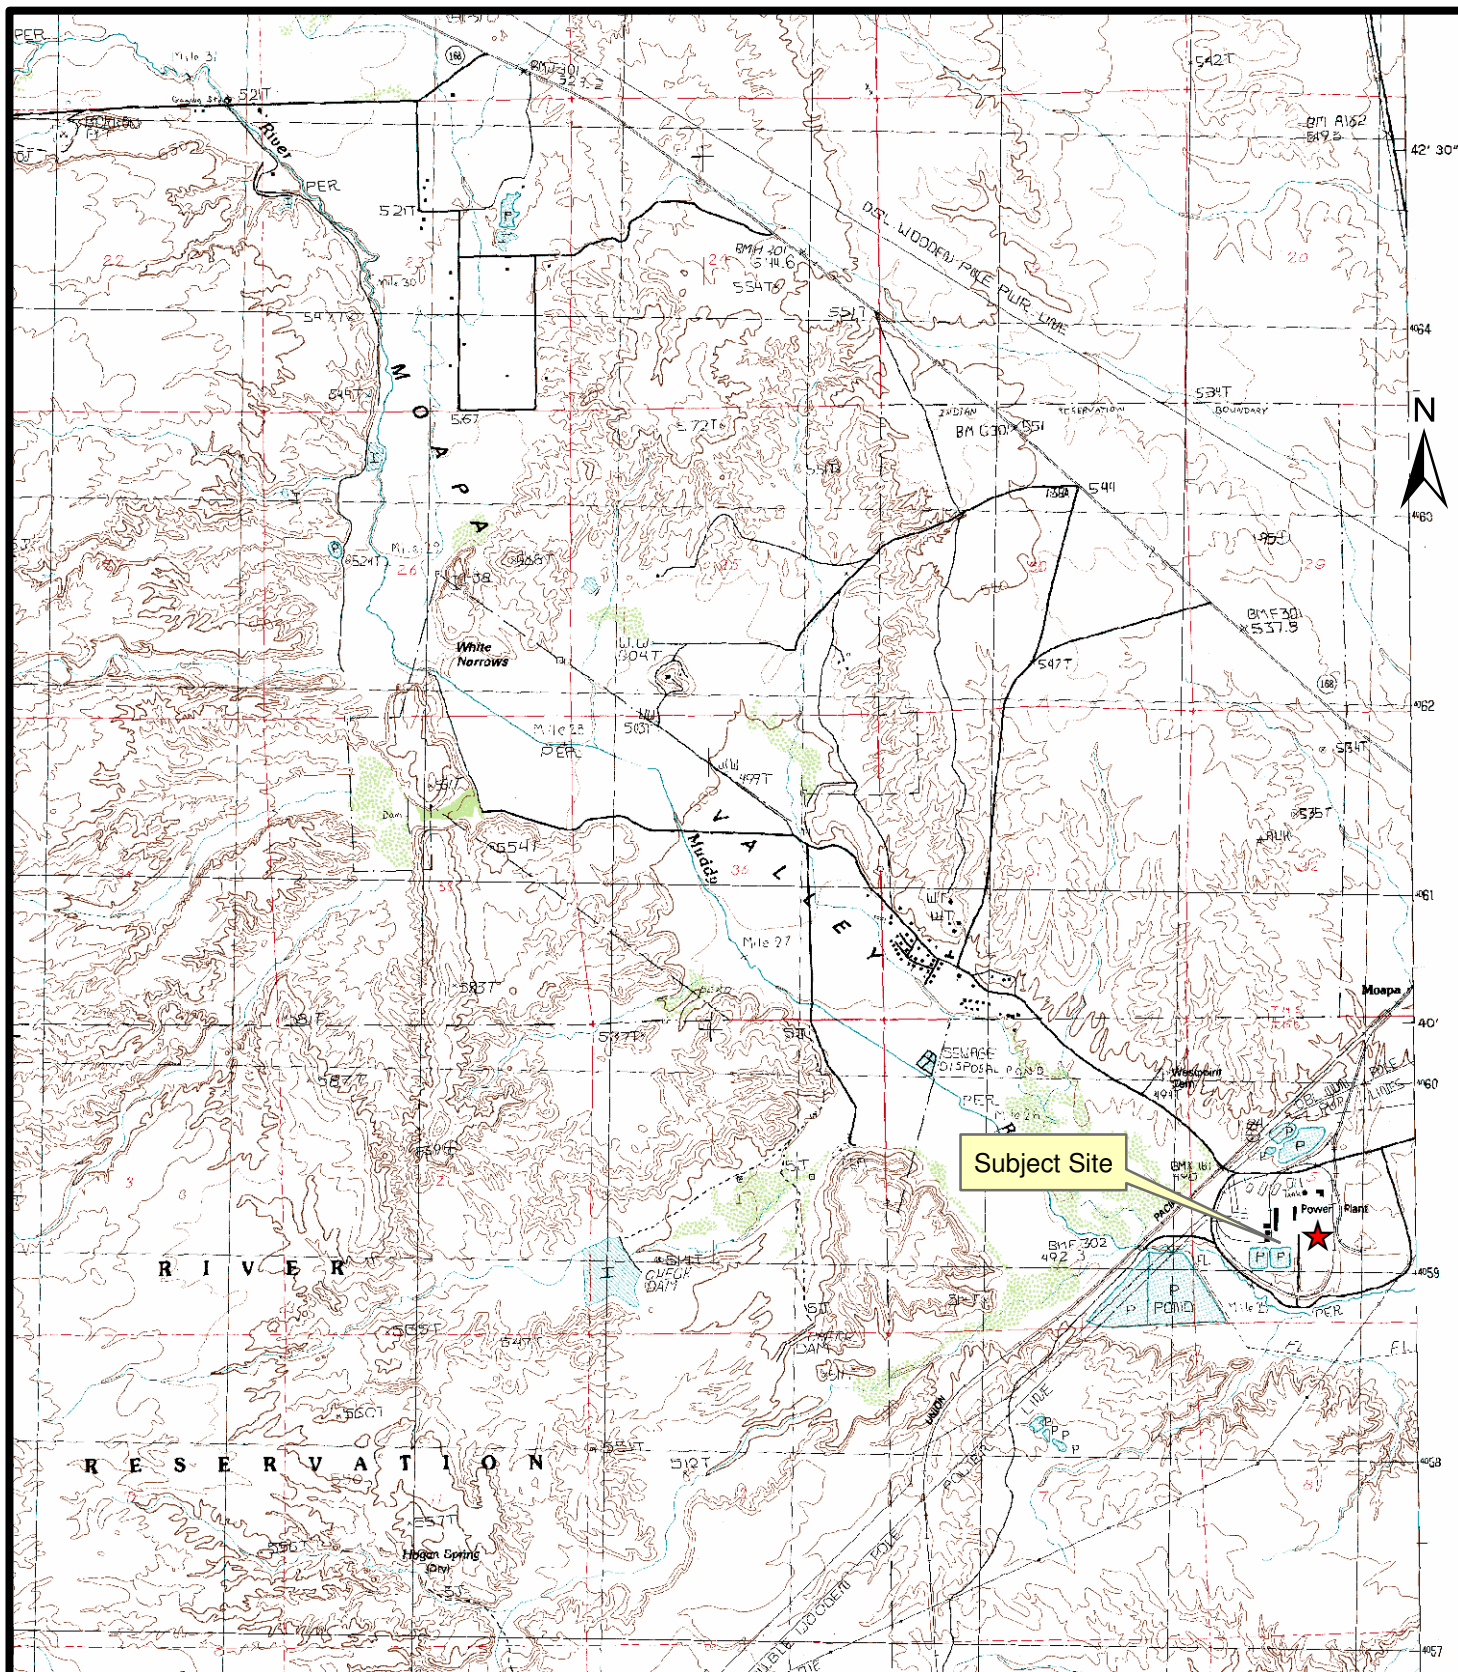

Small Group Stakeholder Meetings. Smaller group meetings may be desirable to discuss specific concerns in a less formal setting. These small meetings will be held on an as needed basis and will be announced by stakeholder invitation.

Public Notification. Public notices will be posted in the newspaper, as needed, to inform the community and stakeholders about the status of the ongoing corrective action activities at the Reid Gardner Station. When necessary, information regarding the site activities will be published in a newspaper which has general circulation surrounding the project area. Newspapers with circulation in the area are the Las Vegas Review Journal and the Moapa Valley Progress.

NPC's Government Affairs Department maintains a contact list that will be used to keep parties informed about activities related to the AOC implementation activities. This list will include elected and appointed officials, local media, and stakeholders and will be updated periodically. Additionally, NPC will forward current and future stakeholder lists to NDEP.
